EDUCATION

Macalester College, Major in Computer and Cognitive Science, Minor in Psychology May 2026
Relevant Coursework: Core Concepts of Computer Science, Object Oriented Programming, Data Structures & Algorithms, Human-Computer Interaction, Internet Computing, Introduction to Artificial Intelligence
Honors: Posse Foundation Full-Tuition Leadership Scholarship, UNCF/3M Scholarship Recipient, Management Leadership for Tomorrow Career Preparation Fellow
UX Design Portfolio: https://hamzastudio.co

EXPERIENCE

User Experience Design Intern May 2025 - Sept 2025
Amazon, People eXperience Technology *Seattle, WA*

- Designed a mobile-first Self Help Experience in collaboration with engineers and product managers, integrating AI-powered search and existing internal tools to help Amazon associates quickly find relevant information across role, site, and schedule transfer workflows. Partnered with UX stakeholders to distribute high-priority workflows between a bottom-sheet experience and Self Help, contributing to positive employee CSAT outcomes.
- Analyzed hundreds of Amazon AtoZ employee inquiries to identify user pain points, prioritize transfer workflows, and inform AI search content and information architecture through data-driven, user-centered design decisions.
- Created user flows, wireframes, and interactive prototypes using Stencile design system in Figma, iterating designs through stakeholder critiques, user feedback, and technical constraints while collaborating with cross-functional engineering and product teams throughout the product lifecycle.

User Research Intern Oct 2023 - Dec 2023
City of Saint Paul *Saint Paul, MN*

- Conducted user research with 15 participants, facilitated card sorting sessions, and synthesized findings to optimize the information architecture of the City of Saint Paul's Human Resources website.
- Redesigned the Talent and Equity Resources experience by creating intuitive information architecture, user flows, and navigation structures that improved content discoverability and usability.
- Synthesized qualitative research into actionable design recommendations that informed site structure, content hierarchy, interaction patterns, and stakeholder decision-making throughout the redesign process.
- Collaborated with designers, developers, and stakeholders to implement user-centered improvements, validate design decisions, and launch enhancements to the live Talent and Equity Resources website.

PROJECTS

Pet Health Mobile Platform: Led end-to-end UX design for an AI-assisted pet health platform featuring a feces analysis tool. Conducted user interviews, competitive audits, and usability studies to define product requirements. Created information architecture, user flows, wireframes, and high-fidelity Figma prototypes. Iterated designs through usability testing and stakeholder feedback.

TutorD Educational Platform: Designed an administrative dashboard for a K–12 STEM learning platform. Conducted competitive audits, cognitive walkthroughs, and directed storytelling to inform design decisions. Translated research into information architecture, user flows, wireframes, and high-fidelity Figma prototypes.

SKILLS

UX and Design Skills: Figma, FigJam, User Research, Usability Testing, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design, Visual Design, Research Synthesis

Technical Skills: Python, Java, JavaScript, HTML, CSS, SQL, React, Django, Flask, Shiny, Git, GitHub, REST APIs, JWT Authentication, Stripe API, ChatGPT, Claude Code, Cursor
